Good morning! In addition to the fence we sent last week, we are looking to get our property ready for our horse. We are going to fix up the current barn, replace broken boards, then paint it white to match the house. We would also like to add a 12x16 shed next to it for hay and tack storage. I've attached a picture of the shed and an aerial view of our property with proposed shed site. Next to the shed we are going to add a tall screen to store manure behind, similar to the photo attached. Let me know, we would like to order the shed but don't want to unless it will work. Thanks again!

Kim
